SANJAY P PURUSHOTHAMAN

Full Stack Developer | Next.js | React.js | Tailwind CSS | JavaScript | Node.js

+971 588 393 705 | +91 90613 81726 | sanjayperingayil@gmail.com | Portfolio | LinkedIn | Dubai, UAE

PROFESSIONAL SUMMARY

Creative and performance-focused **Full Stack Developer** with 4+ years of experience building scalable, secure, and user-centric web applications using **React.js, Next.js, Node.js, MongoDB, and PostgreSQL**. Proficient in building **microservices**, **RESTful/GraphQL APIs**. Excels in Agile teams and is passionate about innovation, clean code, and seamless digital experiences.

CORE TECH SKILLS

- **Frontend:** React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful, GraphQL
- **Databases:** MongoDB, Postgresql
- **DevOps & Tools:** Docker, Jenkins, GitHub Actions, AWS (Lambda, S3, Cognito)
- **Other Tools:** Figma, Postman, Swagger, Jira
- **Concepts:** Microservices, Serverless, CI/CD, JWT/OAuth, Design Patterns, MVC

PROFESSIONAL EXPERIENCE

Full stack Developer
JAH Transport LLC | June2025 – present (Contract)

- Developed and deployed an **Inventory and Supply Chain Management web application** using **Next.js, MongoDB, and REST APIs** to streamline daily operational tracking.
- **Implemented role-based authentication and access control, enhancing data security and user-specific functionality across departments.**

Junior Software Engineer
Softnotions Technologies Pvt. Ltd. | March 2023 – June 2025

- Developed and deployed full-stack applications using **Next.js**, **React.js**, and **Node.js**.
- Designed **REST and GraphQL APIs** to support frontend UI and external integrations.
- Used **Docker** to containerize Node services for scalable deployment across environments.
- Integrated **AI-powered features** (e.g., content suggestions via OpenAI APIs) into React interfaces.
- Created dynamic data visualizations and dashboards with chart libraries.
- Implemented **CI/CD pipelines using Jenkins** and deployed code to staging/production via Git.
- Ensured system security with **OAuth2, JWT**, and input validation best practices.

MERN Stack Developer Trainee
Prepbytes, Remote | July 2022 – March 2023

- Built CRUD-based blog systems and admin dashboards using MongoDB, Express.js, and React.
- Implemented form validations, file uploads, and JWT-based login systems.
- Learned Agile principles and regularly participated in code reviews and standups.

Graphic Designer
Calypso Branding Partner | July 2021 – June 2022

- Designed UI layouts and exported assets for web and mobile design handoffs.
- Built static marketing landing pages using HTML/CSS.

EDUCATION

B.Tech in Electronics and Communication Engineering
Dr. A P J Abdul Kalam Technological University — 2017–2021

KEY STRENGTHS

- Strong grasp of **design patterns**, modular code architecture, and DRY principles
- Solid understanding of **Agile practices** including sprint estimations and incremental delivery
- Analytical mindset for debugging across the stack
